

Termiglass

ACCESSORIES FACT SHEET

QUICKSTRIP STRIP SHIELDING

Ensures faults in render, brickwork or masonry are protected against concealed termite entry. Grooved for optimum bond to mortar, cement and construction adhesives. Excess material easily removed along a groove to give a uniform surface finish - no need for cutting.

FRIZBEE COLLAR

Patent protected collar seals out termites at electrical, plumbing, gas, telephone and other service penetrations. Resistance fitting ensures termite management system integrity when there is movement of ground/slab (reactive soils).

TERMICIDE SEALANT

Termite resistant silicone sealant. Suitable for sealing between other termite resistant materials, saw cuts, shrinkage cracks, footing and slab edge rebates, ant capping, cold joints, key joints and control joints. Termicide Sealant can stretch up to 630% before breaking.
